Summary

Full Stack Developer with 4 years of experience specializing in the MERN stack and modern backend technologies. Adept at building scalable web applications, optimizing database and API performance, and creating seamless user experiences. Proficient in leveraging AI-assisted tools (GitHub Copilot, ChatGPT, SonarLint, Perplexity AI, Cody, etc.) for faster delivery, code quality, and automation, ensuring high-performance solutions. Proven expertise in problem-solving, workflow automation, and leadership, with recognition for delivering high-quality software solutions within deadlines.

Technical Skills

Frontend: HTML, CSS, JavaScript, TypeScript, React JS, Angular, React Native, Redux, Tailwind CSS, Bootstrap, Ionic Framework, Regular Expressions

Backend: Node.js, Express.js, Azure Functions

Database: MongoDB, MySQL, PostgreSQL, Snowflake, Redis

Cloud & DevOps: Azure Functions, Azure Blob Storage, Azure Queue, CI/CD, Jenkins

AI & Productivity Tools: GitHub Copilot, ChatGPT, SonarLint, Cody, Perplexity AI

Tools & Others: Git, SendGrid, Power BI, Talend ETL, Android Studio

Experience

Full Stack Developer – MERN

Integra Software, Puducherry, India Dec 2024 – Present

- Contributing to Workflow Management System (WMS) for e-Book publishing.
- Implementing AI-driven alt-text generation (iAlt) to improve accessibility in digital books.
- Developed automation workflows for error re-triggers, job failure monitoring, and reporting.
- Building backend enhancements with Node.js & PostgreSQL and integrating with Azure services.
- Leveraging AI tools for quick documentation, API testing, and error resolution to deliver projects faster.

Full Stack Developer – MERN

Paripoorna Software, Bengaluru, India Nov 2021 – Nov 2024

- Designed, developed, and deployed full-stack applications using React JS, Node.js, and MongoDB/MySQL.
- Improved API efficiency and backend performance, reducing downtime and increasing scalability.
- Implemented server-side rendering (SSR) and reusable components for optimized performance.
- Used AI-powered code assistance (Copilot, ChatGPT) to accelerate feature delivery and reduce debugging time.
- Engaged directly with clients for requirement discussions, estimations, and solution design.

Projects

1. Fintech Website

Description:

Developed a fintech web and mobile platform with **Loan Origination System (LOS)** and **Loan Management System (LMS)**, enabling seamless loan processing, approval, and repayment tracking.

Roles & Responsibilities:

- Designed **responsive UI** with **React JS** for both web and mobile views.
- Built **secure authentication & authorization** using JWT.
- Implemented **serverless backend functions** with **Azure Functions** for loan calculations and third-party integrations.
- Integrated **MongoDB & MySQL** for hybrid data storage (structured + unstructured).
- Optimized loan workflow APIs, reducing response time by **30%**.
- Configured **Redis caching** for faster data access.
- Deployed services across **AWS & Azure** ensuring scalability.
- Managed version control and CI/CD pipelines via **Git and Azure DevOps**.

Technology: React JS, Node JS, TypeScript, MongoDB, MySQL, Azure Functions, Redis, JWT, AWS, Azure, Git

2. E-Commerce Website

Description:

Built a **full-stack e-commerce platform** for motor products, featuring **real-time inventory management**, product search, and secure payment integration.

Roles & Responsibilities:

- Designed and implemented **frontend UI** with React JS and Bootstrap.
- Developed **REST APIs** for product cata-log, inventory, and order management.
- Integrated **SendGrid** for order confirmation emails and customer communication.
- Implemented **inventory sync** for real-time product availability.
- Optimized **database queries** in MySQL to handle large transaction volumes.
- Enhanced checkout process with secure payment and validation.
- Deployed platform on **Azure cloud** with load balancing for high traffic handling.

Technology: React JS, Node JS, MySQL, Redis, Bootstrap, SendGrid, Azure

3. Depot Management System

Description:

Developed a **shipping container depot management system** to streamline **tracking, scheduling, and resource allocation**, enhancing logistics efficiency.

Roles & Responsibilities:

- Built **Angular-based frontend** for container tracking dashboards.
- Designed and implemented **REST APIs** with .NET C# for scheduling and resource allocation.
- Developed **PostgreSQL database schema** for container logistics data.
- Integrated **JWT authentication** for secure system access.
- Deployed application on **IIS server** ensuring high availability.
- Collaborated with logistics teams to automate **container dispatch & return workflows**.
- Implemented **error logging and monitoring** for faster issue resolution.

Technology: Angular, TypeScript, .NET C#, PostgreSQL, IIS, JWT, Git

4. WMS – Workflow Management System

Description:

Built an **e-Book publishing workflow system (Integra Software project)**, enabling efficient book and chapter creation. Contributed to **iAlt module** (AI-based alt-text generation for images), enhancing accessibility.

Roles & Responsibilities:

- Developed **automation for job failure logs** and **error re-triggers**, reducing manual intervention.
- Built **report generation workflows** for publishing data and error logs.
- Created **Inflow, WIP, Queries** and **Dispatch Reports** for tracking workflow status.
- Implemented **Alt-text file validation** for AI-generated and user-uploaded files.
- Integrated **Azure Blob Storage** for storing publishing assets.
- Configured **CI/CD pipelines with Jenkins** for automated deployments.
- Worked closely with QA to fix publishing pipeline issues, ensuring smooth book release cycles.

Technology: React JS, Node JS, PostgreSQL, Jenkins, Azure Blob Storage, Git

Education

B.Com (Computer Applications) – National College, Trichy
July 2018 – June 2021

Certifications

- Full Stack Engineer – **Magentas (2023)**
-

Honors & Awards

- **Go Getter Award (2023):** Recognized at Paripoorna Software for **exceptional skills and leadership**.
-

Soft Skills

- Strong problem-solving and analytical skills
- Excellent communication & collaboration
- Detail-oriented with focus on quality
- Team player with leadership experience
- Independent & proactive contributor
