

Girinath Selvendran

Senior Full Stack Developer — Immediate Joiner

📍 Chennai, India ✉ girinathselvendran@gmail.com ☎ +91 9942487988

🐙 GitHub in LinkedIn 🌐 Portfolio

Profile

Senior Full Stack Developer with **4.8+ years of experience** designing and building scalable, high-performance web applications across FinTech, Enterprise Publishing, Workflow Automation, and Cloud-native platforms. Strong expertise in React.js, TypeScript, Node.js, Express.js, PostgreSQL, MongoDB, REST APIs, Azure Cloud, and scalable backend architecture. Proven track record of delivering enterprise applications, optimizing performance, integrating AI-powered workflows, mentoring developers, and collaborating with global clients.

Technical Skills

- **Frontend:** React.js, Next.js, JavaScript (ES6+), TypeScript, Redux Toolkit, HTML5, CSS3
- **Styling & UI Libraries:** Tailwind CSS, SCSS, Material UI
- **Backend:** Node.js, Express.js, Azure Functions
- **Authentication:** OAuth, JWT Authentication, RBAC, bcrypt, Rate limiting
- **Databases & Caching:** PostgreSQL, MongoDB, MySQL, Redis, Query Optimization, Indexing
- **Cloud & DevOps:** Azure (Functions, Blob Storage, Queues), CI/CD Pipelines, Azure DevOps, Vercel
- **Testing & QA:** Jest (Unit Testing), JMeter (Performance & Load Testing)
- **Tools & Engineering Practices:** Git, GitHub, ESLint, Prettier, Code Reviews, Debugging, Performance Optimization
- **AI & Automation Tools:** GitHub Copilot, Cursor, ChatGPT, SonarLint, N8N

Professional Experience

Integra Software Services

Senior Full Stack Developer

Dec 2024 – Present

Puducherry, India

- Leading the development of a **Workflow Management System (WMS)** for **enterprise-scale e-book publishing platforms**.
- Designed and optimized **RESTful APIs** using Node.js and PostgreSQL, **improving backend performance by 30%**.
- Implemented **AI-driven alt-text generation (iAlt)** to enhance **digital accessibility compliance**.
- Automated **end-to-end file upload and server-side download workflows**, enabling direct storage in **Integra server paths** without manual intervention.
- Built **job failure detection, retry mechanisms**, and **monitoring automation** to streamline workflow operations.
- Developed operational reports including **Inflow, Outflow, WIP, YTS, Overdue, and Query reports** for workflow tracking and visibility.
- Conducted **code reviews**, managed **Jira tasks**, and collaborated on **client requirement discussions** to ensure **quality and timely delivery**.

Paripoorna Software

Full Stack Developer – MERN

Nov 2021 – Nov 2024

Bengaluru, India

- Designed, developed, and deployed enterprise-grade **MERN applications** for fintech platforms.
- Built scalable **REST APIs** using Node.js and Express with MongoDB and MySQL.
- **Improved backend performance by 30%** through **Redis caching**, query optimization, and efficient API design.
- Implemented **JWT-based authentication** and **role-based access control (RBAC)**.
- Designed and optimized **database schemas, indexes, and aggregation pipelines**.
- Developed **Talend ETL pipelines** to process transactional and operational data.
- Built **Power BI dashboards** for loan disbursements, portfolio growth, collection efficiency, and risk metrics.
- Collaborated with business stakeholders to convert requirements into analytics-ready datasets.
- Led **client discussions**, technical estimations, solution design, and mentored junior developers.
- Awarded **Go Getter Award (2023)** for ownership and delivery excellence.

Projects

AI-Enabled Workflow Automation Platform

Tech Stack: React.js, Node.js, PostgreSQL, Azure Functions, Blob Storage

- Built a **scalable workflow orchestration system** supporting high-volume publishing operations and thousands of concurrent tasks.
- Implemented **skill-based auto task allocation** and **workload balancing algorithms** to improve resource utilization and reduce manual intervention.
- Used AI to automatically extract images and generate alt-text, with a **manual validation step** to review and correct the content before final approval.
- Designed **failure detection, retry mechanisms, and recovery workflows** to enhance system reliability and operational continuity.
- Optimized **PostgreSQL queries and backend APIs** to improve processing efficiency and workflow performance.

FinTech LOS & LMS Platform

Tech Stack: React.js, Node.js, TypeScript, MongoDB, MySQL, Redis, Talend ETL, Power BI, Azure Functions

- Designed and developed end-to-end **Loan Origination System (LOS)** and **Loan Management System (LMS)** covering onboarding, credit evaluation, disbursement, repayment, and loan closure.
- Built secure and scalable **RESTful APIs** handling high-volume financial transactions with strong **data consistency, audit logging, and integrity controls**.
- Optimized system performance using **MongoDB indexing, aggregation pipelines, Redis caching, and asynchronous processing**, improving API responsiveness.
- Implemented **JWT-based authentication** and **fine-grained RBAC** to support multi-role users including operations and partner teams.
- Developed **Talend ETL pipelines** and **Power BI dashboards** to enable portfolio analytics, delinquency tracking, and executive-level reporting.

E-Commerce Platform

Tech Stack: React.js, Node.js, TypeScript, MySQL, Redis, Razor pay, SendGrid, SonarQube

- Designed and developed a **full-stack e-commerce platform** covering **product catalog, cart, checkout, and order lifecycle management**.
- Built **scalable RESTful APIs** with optimized **MySQL queries** and **Redis caching**, improving response performance by **30%**.
- Integrated **Razor pay payment gateway** with secure order creation, **signature verification**, and **webhook-based payment confirmation**.
- Developed **JWT-based authentication** and **role-based access control (RBAC)** for secure user and admin access.
- Used **SonarQube** for **static code analysis** to identify and fix security vulnerabilities and improve code quality.

System Design & Architecture

REST API architecture, database design and optimization, caching strategies, secure authentication flows, CI/CD pipelines, and cloud- native deployment strategies.

Leadership & Collaboration

End-to-end feature ownership, client communication, technical estimations, code reviews, mentoring junior developers, Agile/Scrum practices, and cross-team collaboration.

Education

B.Com – Computer Applications

National College, Trichy

2018 – 2021

Certifications & Awards

Full Stack Engineer – Magentas (2023)

Go Getter Award – Paripoorna Software (2023)
